

-Renewable Energy and Energy Conservation

Description: Conduct projects to move forward in our goal to become a more energy efficient Tribal Community through measures such as wind power expansion, energy efficiency, weatherization, and other activities that reduce greenhouse gas emissions.

Projects include:

- Development of the Lower Sioux Wind Energy Feasibility Project
- Development of the Water/WasteWater Energy Efficiency Plan
- Implement the Small Customer Energy Usage Plan
- Research the use of BioFuels and Biomass Crops
- Conduct Weatherization Assessments of Lower Sioux government buildings
